

IWCS COMMS

Introducing IWCS Marine Communications
Dorian Marine Ltd are please to introduce you to the IWCS marine specific headset comms system designed from the ground up. The IWCS comms system is the culmination of 7 years of R&D to bring what we consider the best headset comms system for search and rescue vessels on the market. The Danish comms system has been developed for all areas of Marine use and the IWCS team have worked with Scandinavian rescue teams to bring comms to the PWC platform

FEATURES
